

Logan County Cooperative Power & Light Association, Inc. Variable Budget Billing Agreement

Agreement made on _____, between Logan County Cooperative Power & Light Association, Inc. (hereinafter called the "Cooperative") and _____ (hereinafter called the "member").

The Cooperative agrees to bill the member a variable budget amount each month based on the member's past use history. The amount varies slightly from month to month as the bill will be calculated based on a twelve-month rolling average kilowatt-hour usage, i.e. add the current month's usage to the previous 11 months usage and divide by twelve. Because of this calculation, the billed amount may vary slightly from month to month. To enroll in the Variable Budget Billing Program members must meet the following criteria:

1. Members may be enrolled in the variable budget billing anytime after having 12-months of billing history; and
2. The member must be current on their present bill in order to be considered for variable budget billing; and
3. The member must pay the budget billed amount by the due date, or the gross payment on the level billed amount will apply; and
4. Cooperative reserves the right to adjust the budget billing at any time and limit the beginning of the budget billing to a certain month (s).

The member understands that a failure to meet any of the above terms and conditions of this agreement will cause this agreement to be null and void and the member's electric service account will be removed from the Variable Budget Billing Program.

Either party may cancel this agreement with a thirty-day written notice.
